

Accessing Immunoglobulin

There are three parts to accessing government-funded Ig for your patient, as summarised in the flowchart below:

- 1 confirm the patient's eligibility
- 2 request product through BloodSTAR
- 3 ensure you understand your obligations and responsibilities as a healthcare professional prescribing, authorising, dispensing and managing Ig. Further detail is provided here <https://www.blood.gov.au/lg>

Have you confirmed your patient's eligibility for Government funded IVIg/SCIg?
