

What initial and ongoing support was given to you at this site by the BloodMove Project Leads?

Bianca Strong (Regional BloodSafe Clinical Nurse, Inner North, Angaston Hospital) – Our Clinical Leads provide ongoing clinical support and information to myself as a BloodSafe clinical nurse, as well as the several sites/hospitals within our cluster. We have bi-monthly teleconferences with all BloodSafe clinical nurses across Country Health SA where we again share information and education throughout the whole of Country.

Sharon Saegenschmitter (BloodSafe Contact Nurse, Kapunda Hospital) – Site specifically, the Clinical Nurse, she provided the initial education for management and staff and she's continued to be a support for us so if there's any questions we can easily – good channel of communication – to actually speak to her about issues we may have or ongoing education. She's done out audits for us and she's just been there as a support for us so that all staff can have education. The managers have also been involved with educating the staff that haven't always been available doing shifts and things like that.

Bianca Strong – Our BloodSafe leads are always contactable by email or phone if we have any incidents across any of the sites and we need some direction or some more clinical knowledge. They are always more than happy to lend a hand.
